Course Information

The guidelines for an effective anti-bribery management system were released by the International Organization for Standardization (ISO) in 2016. They describe the requirements for establishing, putting into practice, running, maintaining, and improving an anti-bribery management system (ABMS). It also offers advice on the steps and methods organizations can take to follow these guidelines. Therefore, professionals at Exoexcellence Consultants have created this exclusive course to give you the tools to understand them better, set by the standard ISO 37001.

The first section introduces you to the ISO 37001 standard, its domain, and the importance of implementing its guidelines within a workplace. As you move forward, you will receive explanations of the seven main compliance areas of the ISO 37001 standard, i.e., organization, leadership, planning, support, operation, performance, and growth. We explain each of these compliance areas clause-by-clause to create better readability of the text presented in the course.

By the end of this course, you will learn the goals, domains, guidelines and benefits of ISO 37001. The course's structure is helpful as it emphasizes the sub-clauses in more detail by giving practical explanations. Once completed, you must take a short assessment to obtain the Alison certificate. That said, enroll today in this course and start learning about creating and implementing a robust anti-bribery management system within your organization.

Modules Studied

Module 1: Introduction to ISO 37001 & Basic Requirements

Module 2: The Essential Functions of ABMS

Module 3: Course assessment
